**Basis for Conclusions on IAS 16**

Australian Accounting Standard AASB 116 *Property, Plant and Equipment* (as amended) is set out in paragraphs 1 – Aus83.2 and Appendices A and B. All the paragraphs have equal authority. Paragraphs in **bold type** state the main principles. AASB 116 is to be read in the context of other Australian Accounting Standards, including AASB 1048 *Interpretation of Standards*, which identifies the Australian Accounting Interpretations, and AASB 1057 *Application of Australian Accounting Standards*. In the absence of explicit guidance, AASB 108 *Accounting Policies, Changes in Accounting Estimates and Errors* provides a basis for selecting and applying accounting policies.

## Comparison with IAS 16

AASB 116 *Property, Plant and Equipment* as amended incorporates IAS 16 *Presentation of Financial Statements* as issued and amended by the International Accounting Standards Board (IASB). Australian-specific paragraphs (which are not included in IAS 16) are identified with the prefix “Aus” or “RDR”. Paragraphs that apply only to not-for-profit entities begin by identifying their limited applicability.

### Tier 1

For-profit entities complying with AASB 116 also comply with IAS 16.

Not-for-profit entities’ compliance with IAS 16 will depend on whether any “Aus” paragraphs that specifically apply to not-for-profit entities provide additional guidance or contain applicable requirements that are inconsistent with IAS 16.

### Tier 2

Entities preparing general purpose financial statements under Australian Accounting Standards – Reduced Disclosure Requirements (Tier 2) will not be in compliance with IFRS Standards.

AASB 1053 *Application of Tiers of Australian Accounting Standards* explains the two tiers of reporting requirements.

## Accounting Standard AASB 116

The Australian Accounting Standards Board made Accounting Standard AASB 116 *Property, Plant and Equipment* under section 334 of the *Corporations Act 2001* on 7 August 2015.

This compiled version of AASB 116 applies to annual periods beginning on or after 1 January 2020 but before 1 January 2021. It incorporates relevant amendments contained in other AASB Standards made by the AASB up to and including 21 May 2019 (see Compilation Details).

## Accounting Standard AASB 116 *Property, Plant and Equipment*

### Objective

- 1 The objective of this Standard is to prescribe the accounting treatment for property, plant and equipment so that users of the financial statements can discern information about an entity's investment in its property, plant and equipment and the changes in such investment. The principal issues in accounting for property, plant and equipment are the recognition of the assets, the determination of their carrying amounts and the depreciation charges and impairment losses to be recognised in relation to them.

AusCF1

AusCF entities are:

- (a) not-for-profit entities; and
- (b) for-profit entities that are not applying the *Conceptual Framework for Financial Reporting* (as identified in AASB 1048 *Interpretation of Standards*).

For AusCF entities, the term 'reporting entity' is defined in AASB 1057 *Application of Australian Accounting Standards* and Statement of Accounting Concepts SAC 1 *Definition of the Reporting Entity* also applies. For-profit entities applying the *Conceptual Framework for Financial Reporting* are set out in paragraph Aus1.1 of the *Conceptual Framework*.

### Scope

- 2 **This Standard shall be applied in accounting for property, plant and equipment except when another Standard requires or permits a different accounting treatment.**

3 This Standard does not apply to:

- (a) property, plant and equipment classified as held for sale in accordance with AASB 5 *Non-current Assets Held for Sale and Discontinued Operations*.
- (b) biological assets related to agricultural activity other than bearer plants (see AASB 141 *Agriculture*). This Standard applies to bearer plants but it does not apply to the produce on bearer plants.
- (c) the recognition and measurement of exploration and evaluation assets (see AASB 6 *Exploration for and Evaluation of Mineral Resources*).
- (d) mineral rights and mineral reserves such as oil, natural gas and similar non-regenerative resources.

However, this Standard applies to property, plant and equipment used to develop or maintain the assets described in (b)–(d).

4 [Deleted]

5 An entity using the cost model for investment property in accordance with AASB 140 *Investment Property* shall use the cost model in this Standard for owned investment property.

### Definitions

6 **The following terms are used in this Standard with the meanings specified:**

*A bearer plant is a living plant that:*

- (a) is used in the production or supply of agricultural produce;
- (b) is expected to bear produce for more than one period; and
- (c) has a remote likelihood of being sold as agricultural produce, except for incidental scrap sales.

(Paragraphs 5A–5B of AASB 141 elaborate on this definition of a bearer plant.)

*Carrying amount* is the amount at which an asset is recognised after deducting any accumulated depreciation and accumulated impairment losses.

*Cost* is the amount of cash or cash equivalents paid or the fair value of the other consideration given to acquire an asset at the time of its acquisition or construction or, where applicable, the amount attributed to that asset when initially recognised in accordance with the specific requirements of other Australian Accounting Standards, eg AASB 2 *Share-based Payment*.

*Depreciable amount* is the cost of an asset, or other amount substituted for cost, less its residual value.

*Depreciation* is the systematic allocation of the depreciable amount of an asset over its useful life.

*Entity-specific value* is the present value of the cash flows an entity expects to arise from the continuing use of an asset and from its disposal at the end of its useful life or expects to incur when settling a liability.

*Fair value* is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. (See AASB 13 *Fair Value Measurement*.)

*An impairment loss* is the amount by which the carrying amount of an asset exceeds its recoverable amount.

*Property, plant and equipment* are tangible items that:

- (a) are held for use in the production or supply of goods or services, for rental to others, or for administrative purposes; and
- (b) are expected to be used during more than one period.

*Recoverable amount* is the higher of an asset's fair value less costs to sell and its value in use.

The *residual value* of an asset is the estimated amount that an entity would currently obtain from disposal of the asset, after deducting the estimated costs of disposal, if the asset were already of the age and in the condition expected at the end of its useful life.

*Useful life* is:

- (a) the period over which an asset is expected to be available for use by an entity; or
- (b) the number of production or similar units expected to be obtained from the asset by an entity.

## Recognition

---

- 7 The cost of an item of property, plant and equipment shall be recognised as an asset if, and only if:
- (a) it is probable that future economic benefits associated with the item will flow to the entity; and
  - (b) the cost of the item can be measured reliably.
- 8 Items such as spare parts, stand-by equipment and servicing equipment are recognised in accordance with this Standard when they meet the definition of property, plant and equipment. Otherwise, such items are classified as inventory.
- 9 This Standard does not prescribe the unit of measure for recognition, ie what constitutes an item of property, plant and equipment. Thus, judgement is required in applying the recognition criteria to an entity's specific circumstances. It may be appropriate to aggregate individually insignificant items, such as moulds, tools and dies, and to apply the criteria to the aggregate value.
- 10 An entity evaluates under this recognition principle all its property, plant and equipment costs at the time they are incurred. These costs include costs incurred initially to acquire or construct an item of property, plant and equipment and costs incurred subsequently to add to, replace part of, or service it. The cost of an

item of property, plant and equipment may include costs incurred relating to leases of assets that are used to construct, add to, replace part of or service an item of property, plant and equipment, such as depreciation of right-of-use assets.

## Initial costs

- 11 Items of property, plant and equipment may be acquired for safety or environmental reasons. The acquisition of such property, plant and equipment, although not directly increasing the future economic benefits of any particular existing item of property, plant and equipment, may be necessary for an entity to obtain the future economic benefits from its other assets. Such items of property, plant and equipment qualify for recognition as assets because they enable an entity to derive future economic benefits from related assets in excess of what could be derived had those items not been acquired. For example, a chemical manufacturer may install new chemical handling processes to comply with environmental requirements for the production and storage of dangerous chemicals; related plant enhancements are recognised as an asset because without them the entity is unable to manufacture and sell chemicals. However, the resulting carrying amount of such an asset and related assets is reviewed for impairment in accordance with AASB 136 *Impairment of Assets*.

## Subsequent costs

- 12 Under the recognition principle in paragraph 7, an entity does not recognise in the carrying amount of an item of property, plant and equipment the costs of the day-to-day servicing of the item. Rather, these costs are recognised in profit or loss as incurred. Costs of day-to-day servicing are primarily the costs of labour and consumables, and may include the cost of small parts. The purpose of these expenditures is often described as for the ‘repairs and maintenance’ of the item of property, plant and equipment.
- 13 Parts of some items of property, plant and equipment may require replacement at regular intervals. For example, a furnace may require relining after a specified number of hours of use, or aircraft interiors such as seats and galleys may require replacement several times during the life of the airframe. Items of property, plant and equipment may also be acquired to make a less frequently recurring replacement, such as replacing the interior walls of a building, or to make a nonrecurring replacement. Under the recognition principle in paragraph 7, an entity recognises in the carrying amount of an item of property, plant and equipment the cost of replacing part of such an item when that cost is incurred if the recognition criteria are met. The carrying amount of those parts that are replaced is derecognised in accordance with the derecognition provisions of this Standard (see paragraphs 67–72).
- 14 A condition of continuing to operate an item of property, plant and equipment (for example, an aircraft) may be performing regular major inspections for faults regardless of whether parts of the item are replaced. When each major inspection is performed, its cost is recognised in the carrying amount of the item of property, plant and equipment as a replacement if the recognition criteria are satisfied. Any remaining carrying amount of the cost of the previous inspection (as distinct from physical parts) is derecognised. This occurs regardless of whether the cost of the previous inspection was identified in the transaction in which the item was acquired or constructed. If necessary, the estimated cost of a future similar inspection may be used as an indication of what the cost of the existing inspection component was when the item was acquired or constructed.

## Measurement at recognition

---

- 15 **An item of property, plant and equipment that qualifies for recognition as an asset shall be measured at its cost.**
- Aus15.1 **Notwithstanding paragraph 15, *not-for-profit entities* shall initially measure the cost of an item of property, plant and equipment at fair value in accordance with AASB 13 *Fair Value Measurement* where the consideration for the asset is significantly less than fair value principally to enable the entity to further its objectives. AASB 1058 *Income of Not-for-Profit Entities* addresses the recognition of related amounts.**
- Aus15.2 [Deleted by the AASB]
- Aus15.3 In respect of not-for-profit entities, for the purposes of this Standard, the initial recognition and measurement at fair value of an item of property, plant and equipment in accordance with paragraph Aus15.1 does not constitute a revaluation. Accordingly, the revaluation requirements in paragraph 31, and the supporting commentary in paragraphs 34 and 35, only apply where an entity elects to revalue an item of property, plant and equipment after its recognition.

## Elements of cost

- 16 The cost of an item of property, plant and equipment comprises:
- (a) its purchase price, including import duties and non-refundable purchase taxes, after deducting trade discounts and rebates.
  - (b) any costs directly attributable to bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by management.
  - (c) the initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located, the obligation for which an entity incurs either when the item is acquired or as a consequence of having used the item during a particular period for purposes other than to produce inventories during that period.
- 17 Examples of directly attributable costs are:
- (a) costs of employee benefits (as defined in AASB 119 *Employee Benefits*) arising directly from the construction or acquisition of the item of property, plant and equipment;
  - (b) costs of site preparation;
  - (c) initial delivery and handling costs;
  - (d) installation and assembly costs;
  - (e) costs of testing whether the asset is functioning properly, after deducting the net proceeds from selling any items produced while bringing the asset to that location and condition (such as samples produced when testing equipment); and
  - (f) professional fees.
- 18 An entity applies AASB 102 *Inventories* to the costs of obligations for dismantling, removing and restoring the site on which an item is located that are incurred during a particular period as a consequence of having used the item to produce inventories during that period. The obligations for costs accounted for in accordance with AASB 102 or AASB 116 are recognised and measured in accordance with AASB 137 *Provisions, Contingent Liabilities and Contingent Assets*.
- 19 Examples of costs that are not costs of an item of property, plant and equipment are:
- (a) costs of opening a new facility;
  - (b) costs of introducing a new product or service (including costs of advertising and promotional activities);
  - (c) costs of conducting business in a new location or with a new class of customer (including costs of staff training); and
  - (d) administration and other general overhead costs.
- 20 Recognition of costs in the carrying amount of an item of property, plant and equipment ceases when the item is in the location and condition necessary for it to be capable of operating in the manner intended by management. Therefore, costs incurred in using or redeploying an item are not included in the carrying amount of that item. For example, the following costs are not included in the carrying amount of an item of property, plant and equipment:
- (a) costs incurred while an item capable of operating in the manner intended by management has yet to be brought into use or is operated at less than full capacity;
  - (b) initial operating losses, such as those incurred while demand for the item's output builds up; and
  - (c) costs of relocating or reorganising part or all of an entity's operations.
- 21 Some operations occur in connection with the construction or development of an item of property, plant and equipment, but are not necessary to bring the item to the location and condition necessary for it to be capable of operating in the manner intended by management. These incidental operations may occur before or during the construction or development activities. For example, income may be earned through using a building site as a car park until construction starts. Because incidental operations are not necessary to bring an item to the location and condition necessary for it to be capable of operating in the manner intended by management, the income and related expenses of incidental operations are recognised in profit or loss and included in their respective classifications of income and expense.
- 22 The cost of a self-constructed asset is determined using the same principles as for an acquired asset. If an entity makes similar assets for sale in the normal course of business, the cost of the asset is usually the same as the cost of constructing an asset for sale (see AASB 102). Therefore, any internal profits are eliminated

in arriving at such costs. Similarly, the cost of abnormal amounts of wasted material, labour, or other resources incurred in self-constructing an asset is not included in the cost of the asset. AASB 123 *Borrowing Costs* establishes criteria for the recognition of interest as a component of the carrying amount of a self-constructed item of property, plant and equipment.

- 22A Bearer plants are accounted for in the same way as self-constructed items of property, plant and equipment before they are in the location and condition necessary to be capable of operating in the manner intended by management. Consequently, references to ‘construction’ in this Standard should be read as covering activities that are necessary to cultivate the bearer plants before they are in the location and condition necessary to be capable of operating in the manner intended by management.

## Measurement of cost

- 23 The cost of an item of property, plant and equipment is the cash price equivalent at the recognition date. If payment is deferred beyond normal credit terms, the difference between the cash price equivalent and the total payment is recognised as interest over the period of credit unless such interest is capitalised in accordance with AASB 123.
- 24 One or more items of property, plant and equipment may be acquired in exchange for a non-monetary asset or assets, or a combination of monetary and non-monetary assets. The following discussion refers simply to an exchange of one non-monetary asset for another, but it also applies to all exchanges described in the preceding sentence. The cost of such an item of property, plant and equipment is measured at fair value unless (a) the exchange transaction lacks commercial substance or (b) the fair value of neither the asset received nor the asset given up is reliably measurable. The acquired item is measured in this way even if an entity cannot immediately derecognise the asset given up. If the acquired item is not measured at fair value, its cost is measured at the carrying amount of the asset given up.
- 25 An entity determines whether an exchange transaction has commercial substance by considering the extent to which its future cash flows are expected to change as a result of the transaction. An exchange transaction has commercial substance if:
- (a) the configuration (risk, timing and amount) of the cash flows of the asset received differs from the configuration of the cash flows of the asset transferred; or
  - (b) the entity-specific value of the portion of the entity’s operations affected by the transaction changes as a result of the exchange; and
  - (c) the difference in (a) or (b) is significant relative to the fair value of the assets exchanged.

For the purpose of determining whether an exchange transaction has commercial substance, the entity-specific value of the portion of the entity’s operations affected by the transaction shall reflect post-tax cash flows. The result of these analyses may be clear without an entity having to perform detailed calculations.

- 26 The fair value of an asset is reliably measurable if (a) the variability in the range of reasonable fair value measurements is not significant for that asset or (b) the probabilities of the various estimates within the range can be reasonably assessed and used when measuring fair value. If an entity is able to measure reliably the fair value of either the asset received or the asset given up, then the fair value of the asset given up is used to measure the cost of the asset received unless the fair value of the asset received is more clearly evident.
- 27 [Deleted]
- 28 The carrying amount of an item of property, plant and equipment may be reduced by government grants in accordance with AASB 120 *Accounting for Government Grants and Disclosure of Government Assistance*.

## Measurement after recognition

---

- 29 **An entity shall choose either the cost model in paragraph 30 or the revaluation model in paragraph 31 as its accounting policy and shall apply that policy to an entire class of property, plant and equipment.**

### Cost model

- 30 **After recognition as an asset, an item of property, plant and equipment shall be carried at its cost less any accumulated depreciation and any accumulated impairment losses.**

## Revaluation model

31 **After recognition as an asset, an item of property, plant and equipment whose fair value can be measured reliably shall be carried at a revalued amount, being its fair value at the date of the revaluation less any subsequent accumulated depreciation and subsequent accumulated impairment losses. Revaluations shall be made with sufficient regularity to ensure that the carrying amount does not differ materially from that which would be determined using fair value at the end of the reporting period.**

32–  
33 [Deleted]

34 The frequency of revaluations depends upon the changes in fair values of the items of property, plant and equipment being revalued. When the fair value of a revalued asset differs materially from its carrying amount, a further revaluation is required. Some items of property, plant and equipment experience significant and volatile changes in fair value, thus necessitating annual revaluation. Such frequent revaluations are unnecessary for items of property, plant and equipment with only insignificant changes in fair value. Instead, it may be necessary to revalue the item only every three or five years.

35 When an item of property, plant and equipment is revalued, the carrying amount of that asset is adjusted to the revalued amount. At the date of the revaluation, the asset is treated in one of the following ways:

- (a) the gross carrying amount is adjusted in a manner that is consistent with the revaluation of the carrying amount of the asset. For example, the gross carrying amount may be restated by reference to observable market data or it may be restated proportionately to the change in the carrying amount. The accumulated depreciation at the date of the revaluation is adjusted to equal the difference between the gross carrying amount and the carrying amount of the asset after taking into account accumulated impairment losses; or
- (b) the accumulated depreciation is eliminated against the gross carrying amount of the asset.

The amount of the adjustment of accumulated depreciation forms part of the increase or decrease in carrying amount that is accounted for in accordance with paragraphs 39, Aus39.1, 40, Aus40.1 and Aus40.2.

36 **If an item of property, plant and equipment is revalued, the entire class of property, plant and equipment to which that asset belongs shall be revalued.**

37 A class of property, plant and equipment is a grouping of assets of a similar nature and use in an entity's operations. The following are examples of separate classes:

- (a) land;
- (b) land and buildings;
- (c) machinery;
- (d) ships;
- (e) aircraft;
- (f) motor vehicles;
- (g) furniture and fixtures;
- (h) office equipment; and
- (i) bearer plants.

38 The items within a class of property, plant and equipment are revalued simultaneously to avoid selective revaluation of assets and the reporting of amounts in the financial statements that are a mixture of costs and values as at different dates. However, a class of assets may be revalued on a rolling basis provided revaluation of the class of assets is completed within a short period and provided the revaluations are kept up to date.

39 **If an asset's carrying amount is increased as a result of a revaluation, the increase shall be recognised in other comprehensive income and accumulated in equity under the heading of revaluation surplus. However, the increase shall be recognised in profit or loss to the extent that it reverses a revaluation decrease of the same asset previously recognised in profit or loss.**

Aus39.1 **Notwithstanding paragraph 39, in respect of not-for-profit entities, if the carrying amount of a class of assets is increased as a result of a revaluation, the net revaluation increase shall be recognised in other comprehensive income and accumulated in equity under the heading of revaluation surplus. However, the net revaluation increase shall be recognised in profit**

or loss to the extent that it reverses a net revaluation decrease of the same class of assets previously recognised in profit or loss.

40 If an asset's carrying amount is decreased as a result of a revaluation, the decrease shall be recognised in profit or loss. However, the decrease shall be recognised in other comprehensive income to the extent of any credit balance existing in the revaluation surplus in respect of that asset. The decrease recognised in other comprehensive income reduces the amount accumulated in equity under the heading of revaluation surplus.

Aus40.1 Notwithstanding paragraph 40, in respect of not-for-profit entities, if the carrying amount of a class of assets decreased as a result of a revaluation, the net revaluation decrease shall be recognised in profit or loss. However, the net revaluation decrease shall be recognised in other comprehensive income to the extent of any credit balance existing in any revaluation surplus in respect of that same class of asset. The net revaluation decrease recognised in other comprehensive income reduces the amount accumulated in equity under the heading of revaluation surplus.

Aus40.2 Notwithstanding paragraph 40, in respect of not-for-profit entities, revaluation increases and revaluation decreases relating to individual assets within a class of property, plant and equipment shall be offset against one another within that class but shall not be offset in respect of assets in different classes.

41 The revaluation surplus included in equity in respect of an item of property, plant and equipment may be transferred directly to retained earnings when the asset is derecognised. This may involve transferring the whole of the surplus when the asset is retired or disposed of. However, some of the surplus may be transferred as the asset is used by an entity. In such a case, the amount of the surplus transferred would be the difference between depreciation based on the revalued carrying amount of the asset and depreciation based on the asset's original cost. Transfers from revaluation surplus to retained earnings are not made through profit or loss.

42 The effects of taxes on income, if any, resulting from the revaluation of property, plant and equipment are recognised and disclosed in accordance with AASB 112 *Income Taxes*.

## Depreciation

43 **Each part of an item of property, plant and equipment with a cost that is significant in relation to the total cost of the item shall be depreciated separately.**

44 An entity allocates the amount initially recognised in respect of an item of property, plant and equipment to its significant parts and depreciates separately each such part. For example, it may be appropriate to depreciate separately the airframe and engines of an aircraft. Similarly, if an entity acquires property, plant and equipment subject to an operating lease in which it is the lessor, it may be appropriate to depreciate separately amounts reflected in the cost of that item that are attributable to favourable or unfavourable lease terms relative to market terms.

45 A significant part of an item of property, plant and equipment may have a useful life and a depreciation method that are the same as the useful life and the depreciation method of another significant part of that same item. Such parts may be grouped in determining the depreciation charge.

46 To the extent that an entity depreciates separately some parts of an item of property, plant and equipment, it also depreciates separately the remainder of the item. The remainder consists of the parts of the item that are individually not significant. If an entity has varying expectations for these parts, approximation techniques may be necessary to depreciate the remainder in a manner that faithfully represents the consumption pattern and/or useful life of its parts.

47 An entity may choose to depreciate separately the parts of an item that do not have a cost that is significant in relation to the total cost of the item.

48 **The depreciation charge for each period shall be recognised in profit or loss unless it is included in the carrying amount of another asset.**

49 The depreciation charge for a period is usually recognised in profit or loss. However, sometimes, the future economic benefits embodied in an asset are absorbed in producing other assets. In this case, the depreciation charge constitutes part of the cost of the other asset and is included in its carrying amount. For example, the depreciation of manufacturing plant and equipment is included in the costs of conversion of inventories (see AASB 102). Similarly, depreciation of property, plant and equipment used for development activities may be included in the cost of an intangible asset recognised in accordance with AASB 138 *Intangible Assets*.

## Depreciable amount and depreciation period

- 50 **The depreciable amount of an asset shall be allocated on a systematic basis over its useful life.**
- 51 **The residual value and the useful life of an asset shall be reviewed at least at each financial year-end and, if expectations differ from previous estimates, the change(s) shall be accounted for as a change in an accounting estimate in accordance with AASB 108 *Accounting Policies, Changes in Accounting Estimates and Errors*.**
- 52 Depreciation is recognised even if the fair value of the asset exceeds its carrying amount, as long as the asset's residual value does not exceed its carrying amount. Repair and maintenance of an asset do not negate the need to depreciate it.
- 53 The depreciable amount of an asset is determined after deducting its residual value. In practice, the residual value of an asset is often insignificant and therefore immaterial in the calculation of the depreciable amount.
- 54 The residual value of an asset may increase to an amount equal to or greater than the asset's carrying amount. If it does, the asset's depreciation charge is zero unless and until its residual value subsequently decreases to an amount below the asset's carrying amount.
- 55 Depreciation of an asset begins when it is available for use, ie when it is in the location and condition necessary for it to be capable of operating in the manner intended by management. Depreciation of an asset ceases at the earlier of the date that the asset is classified as held for sale (or included in a disposal group that is classified as held for sale) in accordance with AASB 5 and the date that the asset is derecognised. Therefore, depreciation does not cease when the asset becomes idle or is retired from active use unless the asset is fully depreciated. However, under usage methods of depreciation the depreciation charge can be zero while there is no production.
- 56 The future economic benefits embodied in an asset are consumed by an entity principally through its use. However, other factors, such as technical or commercial obsolescence and wear and tear while an asset remains idle, often result in the diminution of the economic benefits that might have been obtained from the asset. Consequently, all the following factors are considered in determining the useful life of an asset:
- (a) expected usage of the asset. Usage is assessed by reference to the asset's expected capacity or physical output.
  - (b) expected physical wear and tear, which depends on operational factors such as the number of shifts for which the asset is to be used and the repair and maintenance programme, and the care and maintenance of the asset while idle.
  - (c) technical or commercial obsolescence arising from changes or improvements in production, or from a change in the market demand for the product or service output of the asset. Expected future reductions in the selling price of an item that was produced using an asset could indicate the expectation of technical or commercial obsolescence of the asset, which, in turn, might reflect a reduction of the future economic benefits embodied in the asset.
  - (d) legal or similar limits on the use of the asset, such as the expiry dates of related leases.
- 57 The useful life of an asset is defined in terms of the asset's expected utility to the entity. The asset management policy of the entity may involve the disposal of assets after a specified time or after consumption of a specified proportion of the future economic benefits embodied in the asset. Therefore, the useful life of an asset may be shorter than its economic life. The estimation of the useful life of the asset is a matter of judgement based on the experience of the entity with similar assets.
- 58 Land and buildings are separable assets and are accounted for separately, even when they are acquired together. With some exceptions, such as quarries and sites used for landfill, land has an unlimited useful life and therefore is not depreciated. Buildings have a limited useful life and therefore are depreciable assets. An increase in the value of the land on which a building stands does not affect the determination of the depreciable amount of the building.
- 59 If the cost of land includes the costs of site dismantlement, removal and restoration, that portion of the land asset is depreciated over the period of benefits obtained by incurring those costs. In some cases, the land itself may have a limited useful life, in which case it is depreciated in a manner that reflects the benefits to be derived from it.

## Depreciation method

- 60 **The depreciation method used shall reflect the pattern in which the asset's future economic benefits are expected to be consumed by the entity.**

61 **The depreciation method applied to an asset shall be reviewed at least at each financial year-end and, if there has been a significant change in the expected pattern of consumption of the future economic benefits embodied in the asset, the method shall be changed to reflect the changed pattern. Such a change shall be accounted for as a change in an accounting estimate in accordance with AASB 108.**

62 A variety of depreciation methods can be used to allocate the depreciable amount of an asset on a systematic basis over its useful life. These methods include the straight-line method, the diminishing balance method and the units of production method. Straight-line depreciation results in a constant charge over the useful life if the asset's residual value does not change. The diminishing balance method results in a decreasing charge over the useful life. The units of production method results in a charge based on the expected use or output. The entity selects the method that most closely reflects the expected pattern of consumption of the future economic benefits embodied in the asset. That method is applied consistently from period to period unless there is a change in the expected pattern of consumption of those future economic benefits.

62A A depreciation method that is based on revenue that is generated by an activity that includes the use of an asset is not appropriate. The revenue generated by an activity that includes the use of an asset generally reflects factors other than the consumption of the economic benefits of the asset. For example, revenue is affected by other inputs and processes, selling activities and changes in sales volumes and prices. The price component of revenue may be affected by inflation, which has no bearing upon the way in which an asset is consumed.

## Impairment

63 To determine whether an item of property, plant and equipment is impaired, an entity applies AASB 136 *Impairment of Assets*. That Standard explains how an entity reviews the carrying amount of its assets, how it determines the recoverable amount of an asset, and when it recognises, or reverses the recognition of, an impairment loss.

64 [Deleted]

## Compensation for impairment

65 **Compensation from third parties for items of property, plant and equipment that were impaired, lost or given up shall be included in profit or loss when the compensation becomes receivable.**

66 Impairments or losses of items of property, plant and equipment, related claims for or payments of compensation from third parties and any subsequent purchase or construction of replacement assets are separate economic events and are accounted for separately as follows:

- (a) impairments of items of property, plant and equipment are recognised in accordance with AASB 136;
- (b) derecognition of items of property, plant and equipment retired or disposed of is determined in accordance with this Standard;
- (c) compensation from third parties for items of property, plant and equipment that were impaired, lost or given up is included in determining profit or loss when it becomes receivable; and
- (d) the cost of items of property, plant and equipment restored, purchased or constructed as replacements is determined in accordance with this Standard.

## Derecognition

---

67 **The carrying amount of an item of property, plant and equipment shall be derecognised:**

- (a) **on disposal; or**
- (b) **when no future economic benefits are expected from its use or disposal.**

68 **The gain or loss arising from the derecognition of an item of property, plant and equipment shall be included in profit or loss when the item is derecognised (unless AASB 16 *Leases* requires otherwise on a sale and leaseback). Gains shall not be classified as revenue.**

68A However, an entity that, in the course of its ordinary activities, routinely sells items of property, plant and equipment that it has held for rental to others shall transfer such assets to inventories at their carrying amount when they cease to be rented and become held for sale. The proceeds from the sale of such assets shall be recognised as revenue in accordance with AASB 15 *Revenue from Contracts with Customers*.

AASB 5 does not apply when assets that are held for sale in the ordinary course of business are transferred to inventories.

- 69 The disposal of an item of property, plant and equipment may occur in a variety of ways (eg by sale, by entering into a finance lease or by donation). The date of disposal of an item of property, plant and equipment is the date the recipient obtains control of that item in accordance with the requirements for determining when a performance obligation is satisfied in AASB 15. AASB 16 applies to disposal by a sale and leaseback.
- 70 If, under the recognition principle in paragraph 7, an entity recognises in the carrying amount of an item of property, plant and equipment the cost of a replacement for part of the item, then it derecognises the carrying amount of the replaced part regardless of whether the replaced part had been depreciated separately. If it is not practicable for an entity to determine the carrying amount of the replaced part, it may use the cost of the replacement as an indication of what the cost of the replaced part was at the time it was acquired or constructed.
- 71 **The gain or loss arising from the derecognition of an item of property, plant and equipment shall be determined as the difference between the net disposal proceeds, if any, and the carrying amount of the item.**
- 72 The amount of consideration to be included in the gain or loss arising from the derecognition of an item of property, plant and equipment is determined in accordance with the requirements for determining the transaction price in paragraphs 47–72 of AASB 15. Subsequent changes to the estimated amount of the consideration included in the gain or loss shall be accounted for in accordance with the requirements for changes in the transaction price in AASB 15.

## Disclosure

---

- 73 **The financial statements shall disclose, for each class of property, plant and equipment:**
- (a) **the measurement bases used for determining the gross carrying amount;**
  - (b) **the depreciation methods used;**
  - (c) **the useful lives or the depreciation rates used;**
  - (d) **the gross carrying amount and the accumulated depreciation (aggregated with accumulated impairment losses) at the beginning and end of the period; and**
  - (e) **a reconciliation of the carrying amount at the beginning and end of the period showing:**
    - (i) **additions;**
    - (ii) **assets classified as held for sale or included in a disposal group classified as held for sale in accordance with AASB 5 and other disposals;**
    - (iii) **acquisitions through business combinations;**
    - (iv) **increases or decreases resulting from revaluations under paragraphs 31, 39, Aus39.1, 40, Aus40.1 and Aus40.2 and from impairment losses recognised or reversed in other comprehensive income in accordance with AASB 136;**
    - (v) **impairment losses recognised in profit or loss in accordance with AASB 136;**
    - (vi) **impairment losses reversed in profit or loss in accordance with AASB 136;**
    - (vii) **depreciation;**
    - (viii) **the net exchange differences arising on the translation of the financial statements from the functional currency into a different presentation currency, including the translation of a foreign operation into the presentation currency of the reporting entity; and**
    - (ix) **other changes.**
- 74 **The financial statements shall also disclose:**
- (a) **the existence and amounts of restrictions on title, and property, plant and equipment pledged as security for liabilities;**
  - (b) **the amount of expenditures recognised in the carrying amount of an item of property, plant and equipment in the course of its construction;**

(c) **the amount of contractual commitments for the acquisition of property, plant and equipment; and**

(d) **if it is not disclosed separately in the statement of comprehensive income, the amount of compensation from third parties for items of property, plant and equipment that were impaired, lost or given up that is included in profit or loss.**

75 Selection of the depreciation method and estimation of the useful life of assets are matters of judgement. Therefore, disclosure of the methods adopted and the estimated useful lives or depreciation rates provides users of financial statements with information that allows them to review the policies selected by management and enables comparisons to be made with other entities. For similar reasons, it is necessary to disclose:

- (a) depreciation, whether recognised in profit or loss or as a part of the cost of other assets, during a period; and
- (b) accumulated depreciation at the end of the period.

76 In accordance with AASB 108 an entity discloses the nature and effect of a change in an accounting estimate that has an effect in the current period or is expected to have an effect in subsequent periods. For property, plant and equipment, such disclosure may arise from changes in estimates with respect to:

- (a) residual values;
- (b) the estimated costs of dismantling, removing or restoring items of property, plant and equipment;
- (c) useful lives; and
- (d) depreciation methods.

77 **If items of property, plant and equipment are stated at revalued amounts, the following shall be disclosed in addition to the disclosures required by AASB 13:**

- (a) **the effective date of the revaluation;**
- (b) **whether an independent valuer was involved;**
- (c)–(d) [deleted]
- (e) **for each revalued class of property, plant and equipment, the carrying amount that would have been recognised had the assets been carried under the cost model; and**
- (f) **the revaluation surplus, indicating the change for the period and any restrictions on the distribution of the balance to shareholders.**

**Aus77.1 Notwithstanding paragraph 77(e), in respect of not-for-profit entities, for each revalued class of property, plant and equipment, the requirement to disclose the carrying amount that would have been recognised had the assets been carried under the cost model does not apply.**

78 In accordance with AASB 136 an entity discloses information on impaired property, plant and equipment in addition to the information required by paragraph 73(e)(iv)–(vi).

79 Users of financial statements may also find the following information relevant to their needs:

- (a) the carrying amount of temporarily idle property, plant and equipment;
- (b) the gross carrying amount of any fully depreciated property, plant and equipment that is still in use;
- (c) the carrying amount of property, plant and equipment retired from active use and not classified as held for sale in accordance with AASB 5; and
- (d) when the cost model is used, the fair value of property, plant and equipment when this is materially different from the carrying amount.

Therefore, entities are encouraged to disclose these amounts.

## Transitional provisions

80 [Deleted by the AASB]

80A Paragraph 35 in the previous version of this Standard was amended by AASB 2014-1 *Amendments to Australian Accounting Standards*. An entity shall apply that amendment to all revaluations recognised in annual periods beginning on or after the date of initial application of that amendment and in the

immediately preceding annual period. An entity may also present adjusted comparative information for any earlier periods presented, but it is not required to do so. If an entity presents unadjusted comparative information for any earlier periods, it shall clearly identify the information that has not been adjusted, state that it has been presented on a different basis and explain that basis.

- 80B In the reporting period when AASB 2014-6 *Amendments to Australian Accounting Standards – Agriculture: Bearer Plants* is first applied an entity need not disclose the quantitative information required by paragraph 28(f) of IAS 8 for the current period. However, an entity shall present the quantitative information required by paragraph 28(f) of IAS 8 for each prior period presented.
- 80C An entity may elect to measure an item of bearer plants at its fair value at the beginning of the earliest period presented in the financial statements for the reporting period in which the entity first applies AASB 2014-6 and use that fair value as its deemed cost at that date. Any difference between the previous carrying amount and fair value shall be recognised in opening retained earnings at the beginning of the earliest period presented.

## Effective date

---

- 81 An entity shall apply this Standard for annual periods beginning on or after 1 January 2018. Earlier application is encouraged for periods beginning on or after 1 January 2014 but before 1 January 2018. If an entity applies this Standard for a period beginning before 1 January 2018, it shall disclose that fact.
- 81A–  
81D [Deleted by the AASB]
- 81E Paragraph 5 in the previous version of this Standard was amended by AASB 2008-5 *Amendments to Australian Accounting Standards arising from the Annual Improvements Project* issued in July 2008. An entity shall apply that amendment prospectively for annual periods beginning on or after 1 January 2009. Earlier application is permitted if an entity also applies the amendments to paragraphs 8, 9, 22, 48, 53, 53A, 53B, 54, 57 and 85B of AASB 140 at the same time. If an entity applies the amendment for an earlier period it shall disclose that fact.
- 81F–  
81G [Deleted by the AASB]
- 81H AASB 2014-1 *Amendments to Australian Accounting Standards*, issued in June 2014 amended the previous version of this Standard as follows: amended paragraph 35 and added paragraph 80A. An entity shall apply that amendment for annual periods beginning on or after 1 July 2014. Earlier application is permitted. If an entity applies that amendment for an earlier period it shall disclose that fact.
- 81I AASB 2014-4 *Amendments to Australian Accounting Standards – Clarification of Acceptable Methods of Depreciation and Amortisation*, issued in August 2014, amended the previous version of this Standard as follows: amended paragraph 56 and added paragraph 62A. An entity shall apply those amendments prospectively for annual periods beginning on or after 1 January 2016. Earlier application is permitted. If an entity applies those amendments for an earlier period it shall disclose that fact.
- 81J AASB 2014-5 *Amendments to Australian Accounting Standards arising from AASB 15*, issued in December 2014, amended the previous version of this Standard as follows: amended paragraphs 68A, 69 and 72. An entity shall apply those amendments when it applies AASB 15.
- 81K AASB 2014-6 *Amendments to Australian Accounting Standards – Agriculture: Bearer Plants*, issued in December 2014, amended the previous version of this Standard as follows: amended paragraphs 3, 6 and 37 and added paragraphs 22A and 80B–80C. An entity shall apply those amendments for annual periods beginning on or after 1 January 2016. Earlier application is permitted. If an entity applies those amendments for an earlier period, it shall disclose that fact. An entity shall apply those amendments retrospectively, in accordance with AASB 108, except as specified in paragraph 80C.
- 81L AASB 16, issued in February 2016, deleted paragraphs 4 and 27 and amended paragraphs 5, 10, 44 and 68–69. An entity shall apply those amendments when it applies AASB 16.

## Withdrawal of other pronouncements

---

- 82–  
83 [Deleted by the AASB]

## **Commencement of the legislative instrument**

---

Aus83.1 For legal purposes, this legislative instrument commences on 31 December 2016.

## **Withdrawal of AASB pronouncements**

---

Aus83.2 When applied or operative, this Standard repeals AASB 116 *Property, Plant and Equipment* issued in July 2004. Despite the repeal, after the time this Standard starts to apply under section 334 of the Corporations Act (either generally or in relation to an individual entity), the repealed Standard continues to apply in relation to any period ending before that time as if the repeal had not occurred.

[Note: When this Standard applies under section 334 of the Corporations Act (either generally or in relation to an individual entity), it supersedes the application of the repealed Standard.]

## Appendix A

### Australian defined terms

*This appendix is an integral part of the Standard.*

**Aus6.1**            **The following term is also used in this Standard with the meaning specified.**

**A *not-for-profit entity* is an entity whose principal objective is not the generation of profit. A not-for-profit entity can be a single entity or a group of entities comprising the parent and each of the entities that it controls.**

**Aus6.2**            **Examples of property, plant and equipment held by not-for-profit public sector entities include, but are not limited to, infrastructure, cultural, community and heritage assets.**

## **Appendix B**

### **Australian reduced disclosure requirements**

*This appendix is an integral part of the Standard.*

- AusB1** Paragraphs 73(e)(viii), 74(b), 74(d), 77(e), Aus77.1 and 79 of this Standard do not apply to entities preparing general purpose financial statements under Australian Accounting Standards – Reduced Disclosure Requirements. Entities applying Australian Accounting Standards – Reduced Disclosure Requirements may elect to comply with some or all of these excluded requirements.
- AusB2** The requirements that do not apply to entities preparing general purpose financial statements under Australian Accounting Standards – Reduced Disclosure Requirements are also identified in this Standard by shading of the relevant text, except for comparative disclosures subject to RDR paragraphs.
- AusB3** The RDR paragraph in this Standard applies only to entities preparing general purpose financial statements under Australian Accounting Standards – Reduced Disclosure Requirements.
- RDR73.1** An entity applying Australian Accounting Standards – Reduced Disclosure Requirements is not required to disclose the reconciliation specified in paragraph 73(e) for prior periods.

## Australian implementation guidance

*This guidance accompanies, but is not part of, AASB 116. This guidance is pertinent to not-for-profit public sector entities that hold heritage or cultural assets.*

- G1 In accordance with paragraphs 7(b), 15 and Aus15.1 of AASB 116, only those heritage and cultural assets that can be reliably measured are recognised. It depends on the circumstances as to whether the reliable measurement recognition criterion can be satisfied in relation to a particular heritage or cultural asset. Heritage and cultural assets acquired at no cost, or for a nominal cost, are required to be initially recognised at fair value as at the date of acquisition. Depending on circumstances, it may not be possible to reliably measure the fair value as at the date of acquisition of a heritage or cultural asset.
- G2 Of those heritage and cultural assets that satisfy the reliable measurement criterion for initial recognition purposes, paragraph 29 of AASB 116 permits, but does not require, revaluation. However, under AASB 1049 *Whole of Government and General Government Sector Financial Reporting*, GGSs and whole of governments are required to adopt those optional treatments in Australian Accounting Standards that are aligned with the principles or rules in the Australian Bureau of Statistics Government Finance Statistics (GFS) Manual. Consequently, those entities would be required to adopt a revaluation model for heritage and cultural assets recognised under AASB 116 where the reliable measurement recognition criterion is satisfied.
- G3 Furthermore, given the nature of many heritage and cultural assets that meet the recognition criteria, those assets may not have limited useful lives (for example, when the entity adopts appropriate curatorial and preservation policies), and therefore may not be subject to depreciation. However, entities should consider whether the requirements of AASB 136 *Impairment of Assets* apply to such assets.
- G4 The curatorial and preservation policies referred to in paragraph G3 above would typically be those developed and monitored by qualified personnel and include the following:
- (a) a clearly stated objective about the holding and preservation of items;
  - (b) a well-developed plan to achieve the objective, including demonstration of how the policy will be implemented, based on advice by appropriately qualified experts;
  - (c) monitoring procedures; and
  - (d) periodic reviews.

In addition, there would be evidence that the policies have been adopted by the governing body of the entity.

## Compilation details

### Accounting Standard AASB 116 *Property, Plant and Equipment* (as amended)

*Compilation details are not part of AASB 116.*

This compiled Standard applies to annual periods beginning on or after 1 January 2020 but before 1 January 2021. It takes into account amendments up to and including 21 May 2019 and was prepared on 2 March 2020 by the staff of the Australian Accounting Standards Board (AASB).

This compilation is not a separate Accounting Standard made by the AASB. Instead, it is a representation of AASB 116 (August 2015) as amended by other Accounting Standards, which are listed in the Table below.

### Table of Standards

Standard	Date made	FRL identifier	Commence-ment date	Effective date ( <i>annual periods ... on or after ...</i> )	Application, saving or transitional provisions
AASB 116	7 Aug 2015	F2015L01572	31 Dec 2016	( <i>beginning</i> ) 1 Jan 2018	see (a) below
AASB 2015-8	22 Oct 2015	F2015L01840	31 Dec 2016	( <i>beginning</i> ) 1 Jan 2017	see (b) below
AASB 16	23 Feb 2016	F2016L00233	31 Dec 2018	( <i>beginning</i> ) 1 Jan 2019	see (c) below
AASB 2016-4	27 Jun 2016	F2016L01173	31 Dec 2016	( <i>beginning</i> ) 1 Jan 2017	see (d) below
AASB 1058	9 Dec 2016	F2017L00042	31 Dec 2018	( <i>beginning</i> ) 1 Jan 2019	see (c) below
AASB 2016-7	9 Dec 2016	F2017L00043	31 Dec 2016	( <i>beginning</i> ) 1 Jan 2017	see (e) below
AASB 17	19 Jul 2017	F2017L01184	31 Dec 2020	( <i>beginning</i> ) 1 Jan 2021	not compiled*
AASB 2019-1	21 May 2019	F2019L00966	31 Dec 2019	( <i>beginning</i> ) 1 Jan 2020	see (f) below

\* The amendments made by this Standard are not included in this compilation, which presents the principal Standard as applicable to annual periods beginning on or after 1 January 2020 but before 1 January 2021.

- (a) AASB 116 applies to annual periods beginning on or after 1 January 2018 (instead of 1 January 2017) as a result of amendments made by AASB 2015-8 *Amendments to Australian Accounting Standards – Effective Date of AASB 15*. Entities may elect to apply this Standard to annual periods beginning on or after 1 January 2014 but before 1 January 2018.
- (b) Entities may elect to apply this Standard to annual periods beginning before 1 January 2017, provided that AASB 15 *Revenue from Contracts with Customers* is also applied.
- (c) Entities may elect to apply this Standard to annual periods beginning before 1 January 2019, provided that AASB 15 is also applied to the same period.
- (d) Entities may elect to apply this Standard to annual reporting periods beginning before 1 January 2017.
- (e) AASB 2016-7 deferred the effective date of AASB 15 (and its consequential amendments in AASB 2014-5) for not-for-profit entities to annual reporting periods beginning on or after 1 January 2019, instead of 1 January 2018. However, earlier application of AASB 116 (2015) incorporating the text that relates to AASB 15 is permitted, provided that AASB 15 is also applied.
- (f) Entities may elect to apply this Standard to annual periods beginning before 1 January 2020.

## Deleted IAS 16 text

*Deleted IAS 16 text is not part of AASB 116.*

- 80**      **The requirements of paragraphs 24–26 regarding the initial measurement of an item of property, plant and equipment acquired in an exchange of assets transaction shall be applied prospectively only to future transactions.**
- 81A      An entity shall apply the amendments in paragraph 3 for annual periods beginning on or after 1 January 2006. If an entity applies IFRS 6 for an earlier period, those amendments shall be applied for that earlier period.
- 81B      IAS 1 *Presentation of Financial Statements* (as revised in 2007) amended the terminology used throughout IFRSs. In addition it amended paragraphs 39, 40 and 73(e)(iv). An entity shall apply those amendments for annual periods beginning on or after 1 January 2009. If an entity applies IAS 1 (revised 2007) for an earlier period, the amendments shall be applied for that earlier period.
- 81C      IFRS 3 *Business Combinations* (as revised in 2008) amended paragraph 44. An entity shall apply that amendment for annual periods beginning on or after 1 July 2009. If an entity applies IFRS 3 (revised 2008) for an earlier period, the amendment shall also be applied for that earlier period.
- 81D      Paragraphs 6 and 69 were amended and paragraph 68A was added by *Improvements to IFRSs* issued in May 2008. An entity shall apply those amendments for annual periods beginning on or after 1 January 2009. Earlier application is permitted. If an entity applies the amendments for an earlier period it shall disclose that fact and at the same time apply the related amendments to IAS 7 *Statement of Cash Flows*.
- 81F      IFRS 13, issued in May 2011, amended the definition of fair value in paragraph 6, amended paragraphs 26, 35 and 77 and deleted paragraphs 32 and 33. An entity shall apply those amendments when it applies IFRS 13.
- 81G      *Annual Improvements 2009–2011 Cycle*, issued in May 2012, amended paragraph 8. An entity shall apply that amendment retrospectively in accordance with IAS 8 *Accounting Policies, Changes in Accounting Estimates and Errors* for annual periods beginning on or after 1 January 2013. Earlier application is permitted. If an entity applies that amendment for an earlier period it shall disclose that fact.
- 82      This Standard supersedes IAS 16 *Property, Plant and Equipment* (revised in 1998).
- 83      This Standard supersedes the following Interpretations:
- (a)      SIC-6 *Costs of Modifying Existing Software*;
  - (b)      SIC-14 *Property, Plant and Equipment—Compensation for the Impairment or Loss of Items*; and
  - (c)      SIC-23 *Property, Plant and Equipment—Major Inspection or Overhaul Costs*.
