

Sustainability Reporting

Project summary

International investors with global investment portfolios are increasingly calling for high quality, transparent, reliable and comparable reporting by companies on climate and other environmental, social and governance (ESG) matters.

On 3 November 2021, the IFRS Foundation Trustees announced the creation of a new standard-setting board—the International Sustainability Standards Board (ISSB)—to help meet this demand.

In November 2021, the AASB indicated that, at least initially, it intends to develop sustainability reporting requirements for the domestic market.

In February 2022, the AASB formally added the Sustainability Reporting project to its work plan and indicated that this project would be considered a high priority going forward with climate reporting likely to be the first sustainability matter it addresses.

28 February 2022	February 2022 Action Alert

The staff of the AASB have prepared this summary for information purposes only. The Board decisions described are tentative and do not change current accounting pronouncements unless otherwise indicated. Official positions of the AASB are determined only after extensive due process and deliberations. While this summary is regularly updated, it does not provide a comprehensive review or statement of events and should not be treated as such.

AASB Action Alert Update, Minutes and Board Papers

Meeting Date	Update
--------------	--------

February 2022

The Board considered feedback on ITC 46 *AASB Agenda Consultation 2022–2026* regarding its proposed sustainability reporting project. The Board noted significant support for the Board to undertake a project on this topic and decided to add a project to its work program. The Board noted that the positioning of sustainability reporting requirements in the Australian reporting environment and clearly defining the scope of the work on sustainability reporting should be a priority when developing a draft project plan for future consideration.

The Board made the following preliminary decisions to assist staff in developing the draft project plan:

- (a) the work of the International Sustainability Standards Board (ISSB) should be used as the foundation, with modification for Australian matters and requirements. The Board further clarified that the focus for the project should be to prioritise international alignment and only amend (or add to) international sustainability reporting requirements where it is necessary to do so to meet the needs of Australian stakeholders;
- (b) in developing any modifications for Australian-specific circumstances, the Board noted the importance of leveraging off the work of existing sustainability reporting standard-setters and framework providers; and
- (c) the initial scope of the project relates to for-profit entities, with the draft project plan to address how to respond to feedback from for-profit entities of all sizes, not only larger listed entities. The Board decided to consider the not-for-profit sector at a later stage and asked staff to continue to engage with not-for-profit private and public sector entities in considering the initial project development.

The Board considered the preliminary work on the sustainability reporting due process and decided to apply its existing Due Process Framework for Setting Standards.

Staff will bring a draft project plan for the Board’s consideration to a future Board meeting.
